LMP-C160

Replacement lamp for projector model VPL-CX11, 160 Watt UHP

The LMP-C160 is a 160 Watt UHP (Ultra High Performance) lamp for the VPL-CX11 projector. During its entire lifetime you can rely on a constant light output generated by this lamp. When making important presentations, it is better to ensure you always have a projector lamp in spare, especially towards the end of the lamp's lifetime.
